

I urge you to reject the big-money lobbyists from the NAB and, in particular, THEIR petition 04-160. There are many of us who are fed up with the limited choices we have with current AM and FM radio and have elected to spend our own money to get much higher-quality radio nationwide and locally instead of the same old stuff on the broadcast channels. I have a right to listen to better-quality stations and to also receive traffic alerts and other news. I urge you to think about the public and reject the big-money lobby.

Also, why do you allow broadcast TV stations to increase the audio volume so dramatically during commercials? That is unbelievably obnoxious. Please respond. I'd be shocked if you actually did respond, though you work for us, the citizens, correct? Thank you very much.
